Project Proposal

Course Name: Software Development Project

Course No: CSE 3106

Submitted to:

Dr. Amit Kumar Mondal

Associate Professor

Computer Science & Engineering Discipline,

 Khulna University, Khulna.

Submitted by:

Anamul Islam(210219)

Atikullah Atik(210220)

Computer Science & Engineering Discipline,

Khulna University, Khulna.

Project Name: HTML_LEARNER

Project Overview:

The HTML Learner Desktop Application aims to provide an interactive and educational platform for individuals who are learning HTML (Hypertext Markup Language). The application will offer essential features such as an HTML syntax overview, detailed explanations of HTML attributes, and guidance for HTML practice exercises.

Language: JAVA

User Story Cards:

1. HTML Syntax Overview:

As a user, I can access a structured overview of HTML syntax, including tags, elements, and attributes.

 So that I can understand the fundamentals of HTML markup.

2. HTML Attributes Explanation:

As a user, I can explore detailed explanations of HTML attributes, including their purpose and usage.

So that I can understand how to enhance the functionality and styling of HTML elements.

3. HTML Practice Guidance:

As a user, I can access a variety of HTML practice exercises covering different topics and difficulty levels.

So that I can reinforce my understanding of HTML concepts through hands-on practice.

4. Examples:

As a user,I can access a variety of HTML code example.

So that I can understand how to use HTML tags effectively.

5. Visual Representations of HTML Elements

As a user,I can see visual representations of HTML elements within the application, presented in an intuitive and interactive format.

So that I can understand the appearance and behavior of different HTML elements.
